It's perfectly legal to grow your own food. I just made an error in one of those videos. I have food growing in my back yard. A small government society that has strong borders and good security is fine for now. Yes there is a rise of crazy liberals. I am aware of that. I do not follow either political party. I am nonpartisan and small government. Multiculturalism is screwing up society and you are right.

Society is Brainwashed

WTF has this world come to? Money put those glasses on your face n the shirt on your back n most importantly the roof over your head. Not your money, obviously, but your parents money. I would like to know where is it illegal to grown your own food? There are gardens everywhere.. You really need to go outside, get some friends, get some pussy, something man. What are you going to do when your parents aren't around anymore n you have to go out n the real world n make money or you're gonna be underneath a bridge living.

In case you're wondering, I don't trust the government n I don't believe n adult fairy tales.

@Dominus Sathanas I apologize! I wasn't trying to be a dick.

Sorry if I came off that way. I'm asking you serious question.

What would you do without money? It's obvious that we all need it to survive. I shouldn't of said get friends, pussy etc., but some of your beliefs are crazy to me. I actually believe n some of the stuff you say, but not to the extreme that you do. Anyways beat of luck to you

@ozzy1976 Some of us are targeted, stalked, harassed, microwaved, V2Ked, etc. Others do it instead. Proactive Policing. The Patriot Act. The Vietnam War. So the government wants our lives to basically suck. Parents force family members into psychiatry. When I am on my own I don't care, I am quitting Psychiatry. My website mentioned on this channel says so. I currently have an income (money) from multiple sources and have zero debt.

@ozzy1976 Right now I have online merchants, book sales, advertising on a website, other random merchants, music sales while on Social Security. I have a mental illness label. I got money from the stock market. Some people make money without a regular job. Just saying. It's better to have multiple sources of income than a job that has little to no security. I have yet to check and see how much money is in these accounts. It's also good to save up money so you don't go from paycheck to paycheck. Credit is a debt trap just like college and credit is just for "certain" things.

Dominus Sathanas 2 weeks ago

@ozzy1976 There's always multiple sources of income like online and offline stuff. No one said you needed to work 9-5 or part time. Passive income = multiple sources Some of them are shitty so try harder and find a better solution. Look at Tarl Warwick. He sells like crazy and makes tons of money.

I go on the dark web and the invisible web from time to time. He is right that all these computers can be keylogged from the BIOS.

All computer screens can be seen. Signals Intelligence has everything. All Internet is packet sniffed. Ditch Windows and Mac

OS. I am on MX Linux. I have the lighter linux distros because I am on older hardware. Puppy Linux Xenialpup and MX Linux are the

2 I use with mainly the invisible web and Peer to Peer sorta software. I know of the kind of stuff that has every file you can

think of including illicit activities. It's usually P2P based. The sheep are unaware of it. There are Wans outside of the internet

also. I also run a pirate radio station.

.

illumiNOT 1 month ago

Do you know if you can find unreleased wwe music on that file sharing?

.

Dominus Sathanas 1 month ago

@illumiNOT

Amule/Imule is full of illegal porn. Totally bad. I do not trust it on a computer. Maybe I2P is more decent.

I've done plenty of piracy on a linux box and thepiratebay combined with parent directories, invisible web, Tor Node, I2P, Freenet, Other P2P (linux only) software, some browsers even use special internet protocols not sure about all of it though. You can

pretty much change the file checksum by enlarging as base64 or encrypting and that stops the tracers.

Probably anything. I also go on the invisible web. Not everything on Archive(dot)org is on Google so the other search engines get there also. I know for a fact criminals distribute illegal porn on those. Other stuff is most of the actual internet like whistleblowing and strange information about psychotronics/scalar/lilly and such.

Why You Should Flush Your Meds

immanuel goldstein 1 month ago

Good job determining remote viewing is the telepathic tool "they" use to see what your doing, saying and thinking. Controlled remote viewing (CRV) is used to do all the gang stalking. There is not

much "tech" involved in this at a practical level. CRV is how they do the timed synchronous drive-byes at intersections, etc.... The "all seeing eye" symbol on top of pyramid is a celebration of the elite using telepathy to keep us under them in line. The "pinecones" as seen on pope walking staff and in Vatican is celebration of pineal gland, which is what enables telepathy in humans and animals. The propaganda they use to misguide all of us TIs in these fake TI videos is RNM, synthetic telepathy, smart dust and that kind of BS. And they want us to be followers of "Jesus" so we will be a army of impoverished TIs completely brainwashed into following whatever BS they want us to do. Check out my channel to learn more about all this. Read about Kyle Odom if you are into astral plane activity.

I agree with your comment about psychiatry. Psychiatry is bs. I saw one of your videos and also would suggest you change diets to a more raw diet like the ones Edward Group and Raymond Francis recommends. You can look those doctors up. Natural doctors are better than the doctor you see at a local place. Lunchables are crap and contain excitotoxins just as Russel Blaylock has said.

Those are Coke products. I get stuff. You can look up Russel Blaylock excitotoxicity and Peter Breggin Toxic Psychiatry for extra credit.

Speaking of that Lunchables video you had I should get away from coke like products as well. Flushing my meds also too.

I have a Nut, seed, fruit, and oats with water/vegetable. Less Hybrid/Non Hybrid diet to start trying with intermittent fasting for autophagy encourages good health. I also drink baking soda (make sure it's Sodium Bicarbonate).

You can also haunt the shit out of them through remote viewing while living. Emily told me (she is a ghost) that she can do psychic attacks and make bad things happen to the living. So you are right.

It takes a lot of focus to write something that is not on the internet. You will not hear this from the internet. Only from a random author who heard about it from a ghost.

Computers nowadays use pseudorandom to generate a timeline in someones life. This can be manipulated by ones own thought process. You can make someone be selected as a patient first or last for instance in say a hospital or school.

Jesse Reid 4 months ago

Dominus Sathanas I would like to speak with you more on these topics because I am unfortunately being betrayed by my (our) own government and honestly I appreciate embracing my Dark side but this shit they are doing makes me sick to my stomach literally.but

I would like to get in contact with you but I would only like to through either Tor or some other form of private messenger/or FaceTime because I'm not going to make it easy for these fucks to spy into ANYTHING I'm trying to learn...sorry for making this so long but please let me know if there is a way to contact you

Dominus Sathanas 4 months ago

Tor has been compromised by the government. I would suggest my Openssl Tools I made in Github then encrypt each bit of ascii data on Some messenger like KiwiIRC or Gab.ai.

The only thing that literally works for me is One Time Pads. I can even encode ascii as Base64 and it will get by the censors. All criminals know this and use it as well. What I suggest is encrypting ascii as AES-256-CBC in openssl then copy/paste it into a messenger that is old or based on gab.ai. Sending the password through Lavabit as base64 or Protonmail as Base64. Or Somehow meet up some place would be better. The only practical

thing to me is a one time pad through the mail or a meetup at a park.

Show less

· 1

Dominus Sathanas 4 months ago

I don't even trust tor or any public key encryption.

I really like one time pads. A handwritten letter as one too.

I don't even trust anything Intel or AMBIOS they are all backdoored.

If you are not on Linux already or Minix you are screwed.

Windows should be called HACKOS.

<https://github.com/mrfaildeveloper/one-time-pad>

Combine my openssl bash scripts (AES-256-CBC) with KIWIIRC

Freenode and Gab.ai

<https://github.com/mrfaildeveloper/openssl-bash-scripts>

I wrote this program in Linux

To create a text file or message

(your linux text editor)>>Save file>>bash e file.ext>>your decent password.

You can also do `cat file.ext | base64 >>file2.ext` for extra privacy.

Give the password as base64 in some email service then there we go.

Everything on the internet is monitored. Tor is already compromised.

· 1

These 2 programs are free For Linux and work better than crummy public key encryption.

Dominus Sathanas 4 months ago

You gotta go full end-to-end and not use a weak provider.

I agree that its societies program to make a person commit suicide and dispose of them. Being that its so confusing too. I think gangstalkers could be augmented with mind reading tech. Or contacts and ear implants. Phones and pcs and store cameras record everything a target does. Remote viewing would suck if its real. I think there is a micro camera on my glasses lens. I saw one on someone elses they showed me and asked me after i thought to myself about it being true.

On One Time Pads:

You don't explain why this is perfect secrecy. The reason for that
is

not that there is an enormous amount of results in the case of a
brute

force attack, but it is that these results contain all possible combinations, which mean the attacker will also find all other words

with find letters if the encrypted message was alice. Complete the one-time-pad algorithm with a random length padding and you have unbreakable encryption. Hey, At least it does not use a computer.

Remote Viewing cracks everything though. Pens are easy to get. Black Ballpoints are for remote viewing if you have all white paper.

You know what I am not sure. I know how to prevent it. Get rid of wifi, no smart meter, get away from cell towers. Do a detox. Fast intermittently. Listen to 528 Hz and 4 Hz isochronic tones.

Whenever you mention distilled water people question you. Same with Urine Therapy. I wear a neodymium magnet and moldavite.

I am two cross streets from a cell tower on a water tower.

I have an analogue meter in my house hopefully. I do live next to a cell tower. I do have a router. Those things can cause that. So far, just someone outside yelling at my house but no ringing. I will improve for months on end then one month I will show bad habits.

I drink baking soda (sodium bicarbonate). I fast. I take black walnut extract. I take wheat grass, bovine colostrum, 5HTP, an orotate of lithium (i do not take any carbonates because those are poison), I also take turmeric.

Final Announcement For The Targeted Individuals:

It's the SCALAR WAVES, The Extremely Low Frequency Waves, Infrasound,

Ultrasound, Microwaves, Radio Waves, and The Lilly Wave. Lawyer up and get rid of your smart meter and switch to analogue.

If you haven't already switch to VOIP so you are less likely to get telephone redirects.

Also get a button or flip phone for a more secure OS. Or get Pur.ism or Ubuntu.

Shield your Cards. Wrap your cell phone in aluminum foil then put it in a blockit pocket.

Use: gab.ai, bitchute, protonmail, freedns.zone, virtualshield VPN, Linux, MX Linux, minds.com, lavabit, humanfirewall.com, d.tube, steemit, quit facebook, send through KiwiIRC with a text encryptor such as little lite crypto or openssl instead of SMS and Text. Encrypt files with openssl bash scripts. mrfaildeveloper has the bash scripts to encrypt your files as AES-256-CBC.

Install an AD-Blocker such as adblock plus or ublock origin, install Pale Moon, use LUKS drive encryption, back up 50 gigs for free with mega.nz and keep it encrypted. Install megasync for easy access to those 50 gig accounts. Host on Archive.org and Archive.is. Use box.com, idrive.com, (blogger for rasters), (Get a domain like one cheap on hostinger if you don't have much money.) google drive, mega.nz, archive.org, multiple anon accounts backed

up to eachother so you can recover them. Become invincible. Bid
bond your way out. Stop watching the stupid television. Read
books. Treasury Direct and Fedwire are awesome. Try them out.
Fuck the system.

Here is the info on the scalar coming from anything chipped.

E.G. Television, Radio, Computers

Lilly Wave Dr Patrick Flanagan w Jeff Rense

<https://www.youtube.com/watch?v=um0jm4yfkkk>

I believe buying a spark or ozone generator or even an induction
heater, anti-scalar devices from humanfirewall.com, and wearing a
neodymium magnet in say your sock or on your leg, getting a 7.8
schumann generator from eBay.

Would all help a bit. So would supplements like Wheatgrass, irish
moss, and

black wallnut. I also like liposomal vitamin C and colloidal copper.

Also switch to Linux, GNU, MINIX, or BSD for better security
then drive encrypt so no illegal videos get on your HDD. Listen to
meditation tracks on an MP3 player or a CD player to stop the
SCALAR, Extremely Low Frequency, and Lilly Waves. 528 Hz as a
sine wave can be generated in Audacity for 58 minutes at say 20
or 80 percent. This track is a healer.

I'm pretty sure it's psychotronics. If you have an MP3 player you can listen to a solfeggio like "528hz Pure Tone Transformation and Miracles (1HR) (HQ)" which is on YouTube. I can convert the vid to MP3 in Audacity as high quality and listen to it on a non computer aka MP3 Player. DEW's probably mess up CD Players. Videos are also lossy and not lossless so you could make a wav file as 528 sine 80% in Audacity for 58 min then put it on a CD and play in your car or whatever player you have. 528 stops the

negative energy and mind control. You can hear a sound through V2K, Silent Spread Spectrum, Or by other means. Some of it is very old other parts are modern. I would call an acoustical heterodyne obsolete because a kid could build one for his science fair if he knew how to solder. It's 2 piezos and a sound modulation circuit. One tone of 200K another in the other tube as modulated 200K. I just bought wheatgrass and black walnut extract that Scott Snitzer suggested. I also bought a 6x8 scratchpad (fineartamerica) and some blank pens (vistaprint). I usually shop online for the best discounts. I have had my mail tampered with so this program goes so far. I'm supposed to get a second lulu book and a Mug. I am content with what I have. No need to be greedy like the 12 globalists. I have a 80 dollar computer running MX Linux. IBM Lenovo Thinkpad T60. I am deciding on saving up money so I can use my phone and stuff. My other phone I film with. 20 dollar LG Tribute white. Micro SD Card Reader.

We are all spied on the GND wire in our houses is a classified listening mic that the shadow government uses. Alex Jones Show mentioned it when a guest was on. You can search power lines spy/surveillance or something like that. I wrap my cell phone in aluminum foil and send text messages through an IRC channel to Howard my friend. You can also use OpenSSL and Linux on IRC. Text encryptors. You can use little lite crypto with Kiwi IRC freenode and save the flash file of the encryptor in an HTML doc.

One time pads through the mail are also good. Ever since I switched to Linux and Wrapped my phone in aluminum foil the only thing bugging me is the TV. You can also take the battery out of your phone but that is a risk. They have block it pockets you could combine with the aluminum foil. Drive encryption keeps people off of your computer. Just do a hard shutdown whenever they arrive. Also Linux, GNU, Minix, and BSD. Have Far better access controls and better security and in Linux Viruses are a thing of the past.

Also the lilly wave is installed through black boxes in the power lines it is a bipolar type wave. Patrick Flanagan talks about it on a coast to coast podcast. It is kinda like extremely low frequency waves. It effects how you feel. 2.5 for instance causes sexual feelings. 9 causes nausea. 11 causes distress and riots. 7.8 causes peace. 4 causes a relaxed calm feeling. You can buy an ELF generator on Kelly Research or eBay just type 7.8 schumann generator. Also humanfirefall.com sells anti-scalar pendants and I am wearing one. An ozone generator blocks some of the scalar. So does the sparks from a flyback unit. You could run a Jacobs ladder to stop the scalar. Also Induction heaters do the same.

Psychiatry Sucks - It's The Psych Meds
illumiNOT 5 months ago (edited)

Im an on the fence atheist. Because like i said before if God was
real he would have not allowed gangstalking psychiatry v2k mk
ultra human trafficking starvation. Also how did the hundreds if
not thousands of races come to be in only 6000 years after the
flood of noah. Might even be shorter time period im pretty sure.

Also i have some atheist ti music. But its monotone. I want to
write rock and metal soon. I did a lot of rapping. But i have to get
a rap voice or else people say they dont want to listen to it.

Idk, if the creator is real then he had to have come from
somewhere but so would we. And so would they and so would they
and so would they. It makes more sense of "a bio genesis" being
true (or however its said).

Also when i was bible toting on top of my familys torture i ended up going manic 3 times. 1st thinking i was jesus 2nd thinking there was demons in my room 3rd baptising myself. 4th was not religious but i was worried on a vacation that people were after me and going to sacrifice me.

I can be an atheist but not a devil worshipper. The illuminati are that and i aint down with deception rich get richer, feed the rich fuck the poor mentality.

Atheist Targeted Individuals

Dominus Sathanas 5 months ago

I just thinking it's more governmental than anything else. I mean the government can make us hear voices and project images in our mind.

.

Dominus Sathanas 5 months ago

I just think Nigel Nicholson is a real TI like he says on his channel thewatcher33 he does get attacked with sirens and directed energy weapons.

.

Dominus Sathanas 5 months ago

I do not believe in a devil. I do believe in psychic ghosts though.

.

Dominus Sathanas 5 months ago

I just don't think it's a good idea to flame on a persons channel when they do not even believe in a devil in the first place. Nigel Nicholson is badly targeted. He gets ringing ears and headaches from the directed energy weapons plus he is forced in a narcissistic relationship. Plus in a lot of his videos you hear loud sirens and it keeps him awake. Give Nigel a break.

.

illumiNOT 5 months ago

I am in the same situation so dont feel too bad. It's horrible I ended up having delusions of granduer and a "manic" episode. Now i'm on psych meds and have to see a psychiatrist therapist and nurse for a shot.

I have t continue this to get my disability ssi.

I fucked up but felt i couldnt work.

I have to make the best of it now im in slavery and felt like i sold my soul for money.

Anyways about religion i think if God was real then there wouldnt be mk ultra mk delta did multiple personality disorder project

bluebird etc. Community watch organized stalking, domestic terrorism.

But these secret societies and organized cults worship satan and baphomet.

So I wouldnt pick either side or at least pick what is true light. If you found a path that helps maintain yourself thats great. But kundalini and stuff is dangerous.

I wouldnt mess with spirits because if they are real they could be out to harm you.

However if you feel like its improved your way of life more power to ya.

Respectfully we are all on different paths, but this stalking needs to some day be exposed and brought to an end.

GANG STALKING - PSYCHIATRISTS ARE INFILTRATED

Dominus Sathanas 5 months ago

I can do remote viewing but for now you are actually hard to remote view compared to Howard.

You can look up Nigel Nicholson we are both TI's and Atheists as well. I do talk to ghosts and they tell me about the neighbors in clear detail. They could even tell me about your personal life because they are psychic. I profiled a guy named howard. I knew

about his 5150 case for throwing a rock at a window and his pet fish.

When I get to book a hotel or leave home I flush my meds then when I have to take them I do so I don't have too much crap in my system.

Morse Code Electronic Harassment 3-6-2018

Dominus Sathanas 8 months ago (edited)

I could have sworn I heard my neighbors talk about gang stalking someone who was a TI and it could have been me. I know Neighborhood Watch Groups are involved and so is city watch. All this watch/surveillance stuff is unpatriotic and illegal. The patriot act just put everyone on a watchlist. Aparantly to them I am a threat to National Security so I have to be on a Proactive Policing watchlist and there is also Citizens on Patrol as well.

Also a good idea to check household electronics that could be spying on you or get screened if you are chipped. They are litterally trying to chip anyone who goes and sees a dentist. Any Surgery or replacements could be chipped. The other chips are installed by sandmen or surgery type perps.

What triggered a hypersonic sound or voice of god effect was having a computer turned off and something went through the power lines I think and just did something.

There might even be a way to do voice of God through the power lines. If you look up John C. Lilly he's the guy who put Black Boxes on the power grid. There are psychopaths in Homeland Security trying to control the sheep. They are doing a damn good job sedating and fluoridating the populace.

In a way it's covert genocide when you mention it, psychiatrists try to sterilize you with drugs.

I heard it in the center of my skull. It's strange how electronics and the power line would do that. Not to mention I live next to cell towers.

There are Targeted Individuals and the Government/Military Perps who target them. This is a Crime what they are doing you are right. I am just encouraging people to record any strange occurances. It's a good idea.

Hidden Information: We all go to paradise when we die

Targeted Individuals Be Strong 1 year ago

Hey brother I'm a true Yeshua Christian. Not a Sunday rider, but believe as Jesus did bringing love to the prostitutes, thief's, drunks, and vagrants. They killed him because he wouldn't kiss the feet of the priests. They hated him for what he was. Love and

light. Anyway, just like Pagans are being targeted because they seek Christ consciousness through themselves and through Gaia's blessing. The secret is the Universal Creator is inside every human being. You don't need to attend church, eat pork on Tuesday, or light candles on Friday to find his love. Listen the Catholic church will become the New World Order's purification to love and peace. The Christians like me who know most the bible was distorted in order to reign in this false luciferian religion. Christ did exist though and he loves you. It will be Christians like me, Pagans, and Atheists fighting the New World Order. They know with my osoteric background in metaphysics I won't except the cleansing and chip. They know Pagans that don't practice dark magic will also be against it, after all they have hated the Catholic Church for thousands of years. The atheist are pretty much a given. Kind of crazy that all of us will be fighting these zealots together. Anyway, keep your head up. Use quartz, onyx, and shungnite. Also orgonite works well against the black magic of these dark masons and east star psychopaths. I judge no one. I just know that you and I have been chosen as one of the 144,000 in revelations. Be happy my friend Yeshua has chosen you. Check out this video. Do I sound scared or like a bible thumper to you?

Is Christianity Mind Control?

Dominus Sathanas 1 year ago

Yes. Atheist Europe had a successful comet landing. Religious America never had a decent space mission ever since. Religion is a Dangerous Mental Illness. If you live in USA then you know how bad it is. I thankfully live in western Washington away from the bible belt. Some of these counties I went to say God bless at the fast food and I am sick of it. It's perfectly normal to be an Atheist. There are more Atheists than you think. It's just that society is in this delusional state especially in America. What I also really hate is all of their hospitals are catholic and that means "restrictions" and inability to access "books". Screw Catholic Hospitals.

The 2 people I know and talk to are partly delusional. One partially believes in god, the other says he has no labels but never will say he is an Atheist. I am an Atheist and neither one of my 2 closest online friends will admit that they are Atheists.

My parents and my brother trust Fox News and Rush Limbaugh more than they trust the Internet. Let me tell you something The Media is owned by 6 companies. Those six companies get it all from Reuters and the AP. Reuters is owned by the world bank. They deny the credibility of the internet saying anyone can buy a domain. Hostinger is 35 bucks for 3 months. My domain was down for 4 days. GoDaddy does not get you indexed so who knows what is actually on the internet if it is not on bing or yahoo it is probably on google. Fox News just censors you when you call them propaganda and say a million people are dead in Iraq. Fox News called me an anarchist when I said I was a libertarian who was just not affiliated with the left/right parties. I am not a liberal. I am a

small government minarchist! Fox News aired a live suicide which was unprofessional. Fox News is anti-atheist and anti-gay. CNN got Hijacked with a fake news cast and Charles Jaco is a fraud. When you are partially awake or meditative you can travel through what is known as sub-spaces to most remote viewers. I have talked to societal outsiders through sub-spaces. Their computers and print industry is different from ours. I started with landscapes and buildings and grassy knolls. I noticed how you can have a good time without the psychedelics and deep meditation. After you die you are finally able to even remote view peoples banking statments and school grades. I have somehow enumerated and remote viewed. Trade Secrets for ISP's like google bots. I found out how easy it was to deface these websites that are medical based. You could take down a website for days and days. I have commited that crime and was never caught. I do not

reccomend that though. I am just saying you can remote view any kind of code or souce code or any trade secret that the government does not want you seeing. Some of the things you see are graphic like the coroner picking up a dead body. I was discussing politics in the mental hospital. All I did was mention the ten ammendments our certain unalienable rights the act of 1871 and how our birth certificate makes us ward of the state so we never really own a true car or house. Not to see a lawyer or talk to cops because that will make you a bigger ward of the state. How we are all slaves to the crown corporation in London which is a soverign state and how HOMO-Capensis run the banks, Philanthropy, NGO's and the rest of the world. Of course 6 people run the media. Remote viewing could also be used in hacking. The scientific community is sceptical of remote viewing because people today are pretty delusional and skew thier data. I got 9/11 just fine. Area 51 is just a military trainig base. Right now my family is delusional and gets their news from Rush Limbaugh and Fox News. I can just remote view the news if I have to. Ingo Swann sells a DVD on how to do remote viewing. The main way is to meditate for about 3-5 hrs. I am not conventional I do fasting, meditation, and Urine Therapy combined with Distilled Water. There is a community of remote viewers that do believe that we become psychic ghosts when we die. We still have a penis or a vagina just like a human. You can materialialize and appear in human form. Yes this is called OBE or Out of Body experience. Remote Viewing is kinda cool too. I can look at pictures, go on the internet or other dark webs. Just this morning I figured out a new hacking technique through remote viewing. I do a lot of stuff with computers. You can check out the monroe instute and farsight.org. BTW some one by the name of Emily told me we become psychic

ghosts. Also an honor role student with a high GPA who is now secretary for some major education thing also told us students in school that as soon as humans die they become psychic ghosts. How could a External Voice and a HS student tell me this. This student's name was Apryle Santos Donato. One of her family members is a well known elite remote viewer. I guarantee you plenty of ordinary people and remote viewers already know what happens when we die and it is no secret at all. I rejected the church years ago for a different perspective. Neophyte to the seven senses as known in another sub-space.

Psychiatry is a Complete and total fraud. They lock up anyone who believes that when you die you become a psychic ghost or believe in the constitution and Free Speech and Gun Rights. The Psychiatric System is run by Liberal SJW's and I can prove it. All Shrinks I had did not appreciate the Founding Fathers or The Ten Ammendments. Psychiatry is working with the Patriot Act. My psychiatrist wants me to "go to college" wants guns banned and parts of the internet shut down. She is a total extremist SJW. These people do not like my politics. I clearly admit that they lock people up for political views as well. Even in America there is psychiatric reprisal to lock up political dissedents.

Aparently Psychiatry does not believe in free speech or gun rights. My psychiatrist wants gun bans and internet censorship and is a SJW. Never Ever mention Gang Stalking or Psychic Ghosts to these corrupt Mental People. I was institutionalized for simply claiming some conspiracy theories and that when you die you are a psychic ghosts. They gave Tarek this black Egyptian Guy a chokehold and covered it up. Do not say shit to these corrupt mental health people. Get them out of your life. Psychiatry is a Fraud.

Linux comes with built in security. Linux/GNU and BSD usually do not need AV installed for regular use. Just get a firewall. I have that preinstalled and pre-set-up in Manjaro.

I am currently running Manjaro Linux at the moment so I see no need for anti-virus. Especially because I am running my OS on an ISO9660 read only filesystem. What You can do to make a burner is this:

 Buys an IBM ThinkPad T60 Laptop.

 Put's another 32 GB SSD in it 2.5" sata.

 Burns Manjaro 17.0 32 bit to a DVD, burns the iso file.

Boots the DVD from the BIOS F2 F12 F11 DEL depending on BIOS some are UEFI so you Gotta use another Distro like Linux Lite.

 Installs the DVD to the SSD as a read only FS ISO9660.

 sudo dd if=/dev/sr0 of=/dev/sda bs=4M

 sudo fdisk -l

I've gotten into ATM's and other point of sale devices and defaced a medical website. I am an outlaw criminal. Beware.

 TrueOS is another pre-configured version of BSD.

I really Like Amiga on those Aluminum based heatsinks only so they have a hard time doing mind control on us. I had a Lemote Yeeloong that was all free even at the BIOS level. I just had to change the Power Supply to american standard by buying a 19vdc Lenovo psu that was positive to center.

 BTW the AV companies make all the new spyware so the government can spy on you. I have a shut up plug in my laptop, no webcam, Linux only Live SSD ISO9660, Erases all viruses after a reboot.

Exploits can be so bad that no AV will protect you. You could try sandboxie.

If you ever run the corporate less hardened OS's like Andriod they will vibrate your phone over and over again and drain you battery and randomly call 911. Get a dumb phone so a browser exploit does not call 911 and vibrate your phone over and over again. I write exploits and this one program I wrote basically bypasses the BIOS protection and causes some CPU's to overheat and smoke instead of the BIOS shutting off the computer. You can also overwrite firmware to destroy hardware or just corrupt the BIOS so it has to be reset and you get the old BIOS firmware. I believe in only the free bios. I used to own a Lemote Yeeloong Notebook for 500 dollars that booted from a boot.cfg and multiple ext2's instead of those 512 b dd if=/dev/zero of=/dev/sda bs=512 count=1

I do electronics and can put together a 60 hz sine wave oscillator or the riot 11 soviet woodpecker easily hook it to a magnetron and take care of buisness basic 1960ish mind control. I have built overunity free energy before and I can tell you it does exist. Just get several dead cells and hook em in series or just get the cathode of a solar panel and hook it to the phone line and bam 6,000 VDC.

Also Windows is not meant for online use. There are still exploits even for Windows 10 that will lock and overwrite your FS. I use Linux. Linux Online. Windows Offline.

There are still plenty of crazy jackass exploits that will hijack any computer. Just switch to Linux and keep windows offline. Any Kali Kiddie can bypass the AV.

I knew of a kali kiddie who would bypass any antivirus, crypt the Exe and remote access the system and fuck up the registry. You can not trust your Windows with those gamers who click on exe's. Any Antivirus can be bypassed and Antivirus companies are all in on making malware too.

I am considered a total idiot to some of society and The ghosts such as Emily sometimes say I am a total failure and that I should just kill myself. I was once having a 3 hour conversation with the ghost of someone who had just committed suicide by kitchen knife, he stabbed himself in front of his parents and was advising me to do the same.

Mental disorders are usually made up and fake to drug and sedate/mess up people that the political establishment does not agree with these people are elites and philanthropists and bankers running psychiatry. The Same Banking Cartel Elites who live in rural areas run our education system, our media, and psychiatry. We are seeing more and more multinational Corporations controlling the government. Autism is real but

psychiatry is no good for that cannabis oil is good for autism. ADD and ADHD are Fake. Bipolar is Fake. Schizophrenia is very rare and many people are just getting a microwave hearing effect or Silent sound/Silent Spread Spectrum harassment. Audio Spotlight and 2 piezo elements is common. One 200K and the other nominal modulated 200K. Dr. John Hall explains this in his book "A New Breed Satellite Terrorism in the US". Project Soulcatcher is another good book, So is Michael F. Bell. If a person was say mentally retarded you would not take them to a psychiatrist. You would see him to a neurologist. Neurologists are better far better than psychiatrists. Neurologists are more educated than psychiatrists. Depression is usually caused by poor diet and poor nutrition and lack of sunlight. SSRI's worsen depression and cause PSSD which just makes you depressed. A therapist can be either alopathic or naturalpathic. Shamanic therapists might suggest alternative medicine that may even cure cancer. A psychiatrist will just give you a pill that will mess up your kidneys and give you diabetes. A priest is probably schizotypal and mentally ill in a schizotypal way. A priest may perform a ritual of genital mutilation for original sin. Priests are nuts.

With Like Asperger's people will be overdiagnosed that. Psychiatrists want to put everyone on pills. Do not take their pills. Vaccines can cause slight autism and other problems. A lot of people are slightly autistic and function normally in society. Some

of them are rock and metal musicians. If you are a human experimentee or TI it can be like being haunted. There are people that just "think differently". You can actually convince others to "think differently" like a schizotypal shaman Druidic Mariner Native Taino. The Christians just killed off the different cultures and the Rh Negatives. I have always been exceptionally weird and found other weird people at a Satanist meeting or try any other organization Like the Church of the SubGenius. The Church of Satan has a tape called The Black Mass. The Church of the SubGenius has a recruitment Video you can find on YouTube. There are other Satanist like Anton Long who might break the law and I stay away from that. I have been into Thelema because it is original and old. The OTO started off with the deep occult and mystery schools. I just go to Thelema, Satanism, Shamanism, Auto Urine Therapy, Sun Gazing, Being my own Gemini, The Internal Arts, Remote Viewing at random, Meditation, Brainwave Entertainment, Isochronic Tones, Earth Pulse Generators, Radionics, Sacred Geometry, $0.95364808 \times (x)$ makes a pentagram, 1:1.6180339, using the chodnovsky method to get 1 MB of Pi in 3 days as Ascii in Unix Line Ending, Computer stuff involving Openssl and Bash, data uri porn, Using Fedwire to get all of my free money, Bid Bond every crime I commit and opt out of the system, UCC1 any debt I acclaim as a slave, Deny my citizenship and say hello to American National, Look at the Chemtrails in the sky, Distill my water, Talk to the ghosts in my house, Audacity stuff involving the Lilly wave and other Frequencies, Solfeggio Harmonics such as 417 sine and 528 sine for healing, 7.831 sawtooth in Audacity, Steal an ISP with 5a:5a:5a:5a:5a:5a. I am an Atheist who does not believe in God. The Ghosts I communicated with were not supernatural to my understanding they were electromagnetic. The ghost I talked to were Atheists. I do not respect Christianity because it has brought forth many genocides and destruction of the library of Alexandria.

Christianity has cause more deaths than any other religion. The Pagans were killed by the Christians during Hellenic Genocide and other Genocides. The Salem Witch Trials was another one. By the way I still consider people who believe in god to be mentally ill. I just communicate with the actual dead which are stored on my computer as MP3 files. In those MP3 files you can hear people talking. Those people are ghosts. They admit that they are psychic and say that there is no god. I believe them. I consider Original

Paganism to be more philosophical than theistic. A lot of people today are Atheists and Pagan at the same time. I appreciate the Library of Alexandria, Odin, Thor, Freya, Hellenic cultures, and all the non-biblical stuff. I consider the bible to be one of the most fucked up books ever written. The Bible condones, Murder, Homophobia, Genocide, Animal Sacrifice, total annihilation, Slavery, Sexism, Racism, Killing of livestock. Terrible book. I was going to start reading the egyptian book of the dead. Just realized Emperor Constantine was the worst man in our history for he sold our world through the start of a religion which killed off most of the indigenous people in a way no one in this day and age will ever understand. Christianity really is the root to all of societies problems. Julias Caesar is what was called the Jesus of the bible the whole Time. There is a book called Jesus was Caesar which explains what Christianity really was. Emperor Constantine was a ruthless dictator. Constantine sold the world through Christianity by destroying the Pagan Libraries, The Septenary Books and the Library of Alexandria.

My Problem with Christianity it is genocide and forced belief: Paganism was made illegal by an edict of the Emperor Theodosius I in AD 391. The temples of Alexandria were closed by Patriarch Theophilus of Alexandria in AD 391.[32] The historian Socrates of Constantinople describes that all pagan temples in Alexandria were destroyed, including the Serapeum.[34]

Since the Serapeum had at one time housed a part of the Great Library,

some scholars believe that the remains of the Library of Alexandria were

destroyed at this time.[32][35]

However, it is not known how many, if any, books were contained in it

at the time of destruction, and contemporary scholars do not mention the

library directly.[36][37]

I still consider belief in a God or a supernatural to be a delusion.

Delusions just go away as we cross over to ghost life is what I believe. As long as you don't stone people to death or circumcise for original sin or kill people who do not believe in your god like other religious folks I am okay with that. The Christian God Jehova 1 is the most violent destructive mean nasty corrupt god in history. I prefer JR. Bob. Dobbs or Satan. Satan is actually the good guy in the Bible. The Roman Empire just wanted to brainwash us. Emperor Constantine is a corrupt guy who gave us Columbus. Columbus, The Spaniards, The agents of the Crown killed a good amount of the Native Americans. So did Andrew Jackson. FDR started all the War stuff. Obama Ruined healthcare. Bush left us with 911 a false flag done by the government. Then Came the 7/7 bombings all because of the CIA. The CIA is the largest importer

of drugs and started 150 pages worth of well known cults just go to the department of special collections and print em out there off of Santa Barba. Cult Awareness Network Index List of Cults. I Requested the TXT file and printed it out 150 pages of religions and cults some of which were started by the CIA.

Yes you can download the DSM 1 as a PDF or buy it on amazon and see how sexually restrictive it was. Then came liberation.

Psychiatry used to treat blacks like crap. Psychiatry is ass backwards and outdated. At my psych appoitment I see a Holy Bible in the book shelve. It's rediculous.

Neurologists Like Calpurnpiso you can find him on youtube have a better education than psychiatrists do. Psychiatrists are dish washers, Neurologists are the only experts. How much training does a psychiatrist get? Less than a Neurologist and a Doctor. About as much as a cop. Yes they used to do electroshock on gays and the grand mal siezure gave them brain damage. Psychiatry still abuses it's own patients in some nut wards. I have only been in mental hospitals so I am not sure of the extent of the abuse. Also Scientology used to work for and was once a part of psychiatry.

Now Scientology is anti-psychiatry. The CIA worked with Scientology and Psychiatry admittly has remote viewers in different parts. TOP OT's are also well known remote viewers. That info is somewhere burried on the internet. Douglas Valentine talks about it. Google: Monarch The New Phoenix Program 1 and 2 with ii an i. God belief only becomes a dangerous mental illness when you kill, hurt, or circumcise in the name of your god. If you look at religion there is this concept called "original sin" they would say amputate genitals or circumcise to lessen the erogenous feelings that were considered sin. Masturbation was taboo until the 80's and 90's popped in. We have secularized now things are

better. Look at all the porn and you can see that yeah we are secular now. I mean there's shows on that used to be considered taboo. South Park was formed. Beavis and Butthead was formed.

Without the secular we would not have those shows.

Psychiatry is completely unscientific. Mental illnesses are not true diseases. Diseases are found at autopsy when a body dies. I agree.

I am not a SJW either. I still do not consider ghosts to be supernatural just EMF. You may think differently. I am okay with gays and masturbation and all sin and all of that. I see that. Fornication and masturbation is perfectly healthy. Get out of the bible belt and move to a different county or state.

If I were to anyone that America was started off as a republic or that I was into remote viewing and talked to the dead they would look at me like I am crazy. I already get what happens when you die. As soon as humans die they become psychic ghosts. That is all. All the rest of the sheeple do not know that when we die we become psychic ghosts or that the Rose Croix invented the plague which is Christianity the root to all of societies problems. I am my own elite. I am also a remote viewer. I have done OBE and Remote viewing. I record ghost talking like normal people and talk to them for like 3 hrs. No doctors or hospitals

required because you are a psychic human-like being instead. These utopia sub spaces that are other planets, are viewable to deep meditators and remote viewers. You can even remote view this stuff. Look Up Jim Marrs he views other life in other planets. His stuff got banned from the discovery channel. Fuck TV and Israel. This corrupt government is not telling us the truth of what is out there. Many of them are fake. You can record your own and call it public access. lol I have Video of this big ass orb Shooting off from a CRT. When I was younger I had video of an old man appearing in the bedroom when there was no physical proof of a break in. It was in my brothers files. We were running cracked windows XP on 128 MB of ram back then. All the Bloatware services were purged off the system and it booted in 20 seconds.

Sometimes it's static or dust. Sometimes you capture a person either transparent or appearing like a normal person on camera. I have a video of this huge orb on video I might just upload it to youtube. What I did was put an old TV to a blank static station turned the volume up. The TV is a Sony Trinitron KV-9PT50. You can buy one on ebay put a paper clip as the antenna, put it on a blank station, do an invocation to satan, and see if you get a big orb like I did in one of my videos. I was not getting much traction for the video so I deleted the video off of YouTube. It's on my external HDD 1 TB somewhere.

One time I left 240p video for about 8 hrs and caught video of a bearded old man. This one webcam I have caught someone moving around in my bedroom. I saw a transparent person. Usually when you feel them they kinda vibrate. They are fun to cuddle in bed

with. Sometimes they look just like a person. You see those shadows at night roaming really fast. Those are either homeless or ghosts. I stay up late and see the neighborhood watch. Neighborhood watch see people who randomly disappear, then suddenly reappear all the time.

There's no magic with communicating with ghosts they just confront people or talk directly to them. You can either ignore them or talk to them. I have been heavily targeted by a set of ghosts for some time until they have stopped talking to me. Yes they did threaten to make bad things happen to me. Yes remote viewers can kill a goat from several miles away. This stuff is high risk. It would be better to just chill out and go on with living and enjoying your life. Most of those psychics are delusional fake bunk. The remote viewers I know would only bother with a potential terrorist or someone really bad. You seem fine. Some of them are like hello n. when I am on the computer (a harmless greet). Others are like YOUR A LOSER. So The dead can also be evil as well. Shadow people are actually just ghosts. The Anti-psychotics are bad too. Just try other therapies instead like 1 tsp of baking soda in 8 oz of water. I dry orgasm and have to do alternative therapies with citricare and supplements/fasting to repair my body. My kidneys are also strained. I have high blood sugar. I am 220 lbs. I am impotent to the point where I have to do therapy and fasting just to have an orgasm and slightly ejaculate. The people online are all brainwashed assholes who ignore PSSD or Post SSRI Sexual Dysfunction. This is listed in many of my YouTube Videos on this Channel. I have had Major Sexual Dysfunction and genital anesthesia where I could not masturbate and would keep going for like 3-5 hrs. I could literally wank all night with a dull numb feeling and come slightly with a flaccid penis TMI. It started when I was on Respiridal and Saphris. Those 2 drugs will give you genital anesthesia. It sucks. I have peeing/kidney issues where I go to the bathroom every 20 min sometimes I wake up in the middle of the night for no reason. I have had akathisia and restlessness where I pace around the house all the time. I had serotonin syndrome and they the person at the hospital say I can treat the sexual side effects by getting a circumcision. Are these people nuts? How unscientific are these people. So I if I foll them I will have cancer, a botched circumcision, PSSD, Akathisia all the time, Impotence, Genital

I do not think the Migrant workers in Argentina or the Worker COOPS in n America were the best. I would still say Tribalism was the best. What I am saying is there is probably nothing we can do about these NGO's Religious Zealot Politicians, Bankers, PR Propaganda firms, and Philanthropists. The Royalty of Ancient egypt had another species called HOMO-Capensis which are another Alien Hybrid species which is mathematically smarter than us.

I have often preferred tribalism. Tribes were killed off by Columbus and society was replaced. You could easily name 12 different tribes and some in Hawaii. The reason why we have to show up to school for 12/13 years or drop out during those years is because of the act of 1812. From white coats in court to black coats in court. The reason why LSD is against the law is because of the act of 1812. After 1812 our birth certificate made us ward of the state and we all became slaves. After Tribalism was killed off and the Julian Calendar got re-labeled the Gregorian Calendar we all became slaves. We stole from the Native Americans. Those bullshit movies about tribal tolls were all fiction. We (the Christians) were more ruthless then they were. We used up all of their tobacco crops and rebranded a new contaminated tobacco that causes cancer. We were the first to poison tobacco and start slave trades. I used to think in certain ways. I think we are all brainwashed. What is happening now is if you google a word like "Libertarianism" you will get the wrong definition. Be Aware the Government is lying to us intentionally through our dictionaries. They lie about what Anarchy and Libertarianism are. The Dictionaries got Atheism, Anarchism, and Libertarianism all wrong. Many Dictionaries Do not have the word Misandry. Oxford And Webster are Crap. I at least have one Oxford Dict that gets Atheism right.

We just want limited government power. Anarchy is sometimes possible depending on the circumstances and sometimes not. This is what we really want: "radical freedom from government."

This is what some Anarchists want: NO GOV NO STATE
Regular Anarchists do not want socialism, capitalism or communism.

I am independant. Sometimes I want true Capitalism and not The Now Chrony Capitalism. Communism and Socialism are horrible.

The Libertarian Party presidential candidate, Gary Johnson, has adopted the horrific mantra "Libertarianism is about being fiscally conservative and socially liberal."

Libertarianism is no such thing. Libertarianism is about "radical freedom from government."

"Fiscally conservative" in no way reflects the radicalness of the libertarian desire for freedom from government.

It is noteworthy to consider the Wikipedia entry for "fiscal conservative":

I learned more later on by buying books and going on the internet.

I have a bank account, and a brokerage account to buy all the books that I cannot get in PDF or eub. Would much even read older books from the 1700's and 1800's because school is too PC to allow them. You can find plenty of books with this:

archive.org

archive.is

title of book, author, isbn, filetype:pdf

the pirate bay + torrent + Linux to keep the viruses off.

I never listened to these people I even stole and printed out books off of mgx copy and/or a printer. I break copyrights all the time. These people who say we have to pay for education can fuck off. Knowledge should be free and not have propaganda in it. Yale

and Oxford are crap. Most colleges are not even reputable or

accredited. Most of em want to fuck you financially. After

graduating HS I will continue saying no to college and saying fuck the troops and not joining the military either. Who needs these

endless wage slave pink boys. Fuck em' That is all. The bland

normals can fry in hell while the other people in the afterlife can go join up with the sex goddesses. I liked Terrence McKenna when

I was in high school but my teachers hated that researcher and told us not to listen to certain PhD's guys of alternative media and alternative education. The teachers kept us off of youtube and

archive.org which had more books than the school library. I could find more better books on Ebay or Amazon. Barnes n Noble at least

has 1984 by George Orwell.

A less biased Education is pretty much available to anyone with a wifi adapter. Even bums who have cell phones do research at the fast food chains or the hotels use the wifi to read ebooks, pdfs, etc. I like how so much stuff is written in an easy to render

hypertext markup language online. Fuck Those Degrees and PHD's.

I do not need them. I have never been in the workforce. I have been living on my SSI and am okay with that. The government can suck a dick. The public fool system is all propaganda.

People used to always say that I don't know shit in anything. I was gang stalked and beaten up. Stalking started really bad at 24. For some reason they do it to adults 20-50. Guess they die before fifty. Even the Psychiatrists I have had were all verbally abusive and literally would yell "YOUR FUCKING CRAZY KILL YOURSELF" or something along those lines.

Is Christianity Mind Control?

Dominus Sathanas 1 year ago

For some reason I have been targeted stalked and harassed by fundamentalist Christians. The other people outside are known as Christian Perps. I may as well go to ffrf.org and file a church and

state violation with my healthcare provider as well as the people who put me in handcuffs for not being a Christian. I am a Pagan Atheist and people do not see that. People think I am something else when I am not even on Styxhexenhammer666's channel or Calpurnipiso's channel they think I am something else. It's getting ridiculous. I mean that is why I practice Satanism in the first place to get my mind off of the Christianity in my family and in the hospitals I have stayed at. This mental hospital I was at was forcing Christianity down people's throats. I was abused by Christians as a kid.

crashed so I had a second backup luckily. I have 3, 4, 5 backups now and all my files secured. You can get an ammunition canister and lock up your external HDD's. Identity Theft is also common in targeting. In this case Sean Anderson a perp stole my bank info and attempted to dox me online. I am very hard to dox because I do not put my stuff online. If you are being stalked by this agency you need to try & lure them out, If your evidence isn't "compelling enough" then you will just sound crazy, and this is what they want.

<https://www.youtube.com/watch?v=GMeA5i485Eg> Her car windows... it's difficult to see through them into the inside of her car. Windows designed so that it's difficult to see the driver. If you use your head it is possible to get evidence for the internet... to expose this more.

Originally filmed in 2005. They're like "What's going on?". It takes them a good while to click on. The car window design helped. And sending footage away to have it cleaned up... great idea. Lure

them out. I bet her friends believe her now. Gotta get evidence on film... you're trying to convince people of an "unbelievable" thing

Dominus Sathanas 1 year ago

I later discovered this phenomenon as well as PSI Tech, The Remote Viewing Industry. You can even check out FarsightPress on YouTube.

You know how people experience V2k and silent sound. I had an external voice of what sounded like a ghost. They said they died there and were a ghost. They later said they might assassinate my character or something along that line. I had one Direct Voice say "care if I destroy all your stuff". Basically this voice claimed to be a psychic ghost. There was Emily and this one guy who claimed to have committed suicide and became a psychic ghost.

He's taking photo's with the phone or recording with it. That's incase she lashes out... "I was just walking by and... like... this woman just started attacking this guy.... and I was... like... wow... I better

These perps write malware, are into hacking, and do shellcoding/nop sleds, reverse shells.

Some TI's have switched to linux because the perps will put illegal stuff CP on your computer. It's also a good idea to use drive encryption with Linux. I reccomend the LVM Drive encryption that comes with the distro Disk itself. A lot of these perps are computer science people. That's where you get the V2K and Silent sound. There are computer rooms for every county where people enter in go on computers and harass people.

I'm sure some of these perps staying in touch with things like IRC and the Deep Web. I see them waving cell phones by a person or pulling right in front of the other car and flipping the car behind them off.

It's a government agency baiting people to get the victims arrested, etc... it's too organized. Other motives could be to drive you mad enough to commit a "terrorist act"... they gain more power from that. Have an open mind about 9/11. I'm sure they

would love to be able to censor anything they like online without any legal backlash. RT news channel... I'm certain they hate them. Don't let them drive you to violence, that's what they want, they have a camera on you... "I will not throw myself in jail. I will not be the next manufactured terrorist", etc

The interesting thing is you can learn How to do Remote Viewing and get the CRV Manual as well as see what those perps are up to and see what happened on 9/11 or what area 51 is like.

Controlled/Technical Remote Viewing is a possibility for everyone to learn. PSA not for misuse. Used mainly by the military, the CIA, and The Soviet Union as well as the top heads of Scientology. I am not affiliated with any religion because religions I know have been known to stalk. There are DVD courses you can get on Amazon. I

live in a noisy environment right now so it is hard to do Remote Viewing. You can even get the lottery Numbers if you look it up on YouTube. Those Washing Machines and Computers and Monitors are Like Psychotronic Interference.

There are 800-900 Globalists running this earth right now and Bill Hicks a comedian talked about that on his last show and on public access.

6 companies own the mainstream media. All the cool kids I know use the internet to get informed. RT is also not as good as say Lionel Nation. But, you are right the internet is the way to go and replaces television entirely. I just have a laptop running Linux and

have no problem getting online and looking things up. I even get the future news from FarsightPress on YouTube. I was thinking of buying both DVD's Remote Viewing 9/11 and Remote Viewing area 51. Yes the CIA did train other cultures to be terrorists. I read Iran Contra. The CIA is a parapolitically obsessed Drug cartel.

Parapolitics this. Parapolitics that.

The Globalists run what is known as the geopolitical grid. It consists of philanthropy and foreign affairs. They get the best sea food that is not contaminated and can fine and dine on river cruises. They look at us as the idiots. They can break the law if they like because they are on what is known as executive status. A former Globalist talks about this in his video titled. Secrets of the Elite. They live in rural areas of the USA and Europe. They have hyperbaric chambers, get blood replacement from the red market. They also practice things like auto-urine therapy to live longer. Lemons and Lemongrass have been known to cure cancer. Arm and Hammer Baking Soda can also cure cancer, so can Bovine Colostrum and ozonated water. Basic Liver cleanses can be done to remove fatty liver entirely. Cancer cured. Ever head of Sun Gazing. This is stuff your media does not want you to know. I am a sun gazer and can read books and such just fine. I have 20/20 visual acuity. The closer you are to delta brainwave states the easier you can do controlled remote viewing. Remote viewing is a psychic skill that can be taught to a large audience. Yes it is used in the program along with psychotronics. Tim Rifat wrote about remote viewing in one of his books. I have the book in print.

Before the internet there were books and alternative thinkers. Occasionally Public Access would talk about this sort of Globalism. I saw Bill Hicks on Public access talking about a power elite that runs the political grid and how no matter which president we have

it's a middle man. just like on the internet. It was just harder to get Library passports into it.

Lionel Nation is a Libertarian Channel so is Blair White.

Yes The Government are a bunch of Social Justice Warriors PC Liberals and Globalists.

Many of us just want our basic freedoms back and be able to do things like smoke cannabis without being detained.

FarSightPress is an independent News Network on the Internet.

They did a series on Remote Viewing 9/11 and Remote Viewing Area 51.

This is a podcast featuring activist and Targeted Individual (TI) Mrs. Renata Murry, who lives in the Bay Area, California USA.

"People from all walks of life are being recruited to be the eyes and ears of the State. People from all races, ages, genders and every sector of society that you can think of is a part of this. A

targeted individual (T.I.) is a person who has been put in a depopulation program known as *Gangstalking*. The program is funded by the Government, and the T.I. is monitored and harassed 24/7, inside and outside of their home. Most T.I.'s have no idea how they were put into this program or how to get out of it.

Targeting can happen to anyone in society. In the past primary targets of programs such as Cointelpro have been minorities.

Targeting however can happen to anyone. Individuals are often targeted for being outspoken, whistle blowers, dissidents, people who go up against wealthy corporations, woman's groups, (single) women, anti-war proponents, and other innocent individuals. The majority of the targets are often not aware that they are being targeted in this way. For those targets that are aware this is happening, they can be left feeling depressed, suicidal, confused, isolated and mentally unstable. The objective of the campaign is the total destruction of the Target. This is hell on earth. We will discuss this little known and seldom talked about program."

Psychiatric Drug Withdrawal: A Guide for Prescribers, Therapists, Patients and their Families by Peter Breggin, M.D. to learn how to more safely cut back and taper off of psychiatric drugs-- The book also

I would get a pill cutter and slowly wean off. I know it is poison because heck it can ruin someones libido.

I am not a Doctor. Psychiatrists are quacks though.

Antidepressants are not needed for anyone. Depression can be treated naturally with sunlight and exercise. There is no scientific basis for how they work, Psychiatrists are manipulative people. You can stop seeing them as they are no help. I would get a pill cutter and slowly wean off. The top four recommended foods, hormonized dairy, flour are garbage. PR is polite for

propaganda. Supplements like 5HTP and Green Tea, B Vitamins, Chlorella, Oregano, Citric Acid (lemons), Ozonated Water (ozone pump in water), filtered Omega 3's, Probiotic foods such as colostrum, sourcrout, raw pickles, whey, will help when you are off meds. That stuff can cause many side effects such as brain zaps and akathisia. I would switch to a good diet, plenty of water, supplements.

I was on Prozac five years ago, but not it induces violent behavior, it gave me negative physical side effects that I nearly died from it. I nearly fainted and I had bloated stomach, back pains, was in a dream-like state, my anxiety got worse, drowsiness, and was hyperventilating as well having Anxiety Attacks. I was lucky that my doctor took me off cold turkey, I did yelled at my mother when I was off and I almost beat her up for her actions that she had done. After coming off cold turkey, I had withdrawals that lasted a year, I was falsely accused of being disoriented and

drunk. My doctor put me on Klonopin for 4 years then later, I was switched to Valium. I have depression, severe anxiety and undiagnosed C-PTSD. I was once put on Celexa few months ago, but I come off cold turkey by myself as I found out I was way too open and rebellious. A week later, after I come off, I started drinking Caffeine and found out my depression was relieved for good and I cut off Vitamin D (supplements cause me to become depressed, especially in the winter). But Caffeine made me feel socially anxious and asocial. I am not a violent person.

i agree with not circumcising. i was circumcised but have 2 intact sons but schizophrenia is not just believing your god is telling you things. it can make people think other higher powers like the government n companies that make medication are controlling them n they think they have to expose those higher powers n make other people see things that make no sense to any other normal person

+qaz12345wsx54321 Yeah that is common. As long as the IFOFIBA is not prevalent.
